

Nucala 
(mepolizumab)

YOUR COPD MAY BE **DIFFERENT.**

Approved Use

NUCALA is an add-on, prescription maintenance treatment of eosinophilic chronic obstructive pulmonary disease (COPD) in adults whose disease is not controlled. NUCALA is not used to treat sudden breathing problems.

Important Safety Information

Do not use NUCALA if you are allergic to mepolizumab or any of the ingredients in NUCALA.

Do not use to treat sudden breathing problems.

Please see additional Important Safety Information throughout. Please see full Prescribing Information, including Patient Information, for NUCALA at [NUCALA.com](https://www.nucala.com).

COULD MORE BE GOING ON?

Struggling with flare-ups *even* on maintenance inhaler treatments could mean your COPD symptoms are uncontrolled. *And* it could be a sign that you have a **different kind of COPD**.

SIGNS YOUR COPD MAY BE UNCONTROLLED

Reduced activity

More frequent use of a rescue inhaler

A hospital/ER visit

An oral steroid/antibiotic treatment

WHAT'S A FLARE-UP?

Flare-ups (or exacerbations) are when symptoms get so bad you may need additional treatments—like antibiotics or steroids—or even a trip to the hospital.

Having just one flare-up can decrease your lung function, so finding the right treatment for your COPD is important.

FACT:

About 40* of people with COPD have elevated levels of blood eosinophils, which increases the risk of flare-ups.

*34-49%

Please see additional Important Safety Information throughout. Please see full **Prescribing Information**, including **Patient Information**, for NUCALA at NUCALA.com.

LET'S TALK SCIENCE

The inflammation triggering your flare-ups could be caused by **eosinophils**. Eosinophils are normal white blood cells that are part of your immune system. But too many of them may lead to inflammation in your lungs, which can cause flare-ups.

NUCALA TARGETS INFLAMMATION & REDUCES EOSINOPHILS*

NUCALA helps target inflammation that can trigger flare-ups by reducing eosinophils and getting them back within normal levels.

*It is not fully understood how NUCALA works.

Important Safety Information (cont'd)

NUCALA can cause serious side effects, including:

- **allergic (hypersensitivity) reactions, including anaphylaxis.** Serious allergic reactions can happen after you get your NUCALA injection. Allergic reactions can sometimes happen hours or days after you get a dose of NUCALA. Tell your healthcare provider or get emergency help right away if you have any of the following symptoms of an allergic reaction: swelling of your face, mouth, and tongue; breathing problems; fainting, dizziness, feeling lightheaded (low blood pressure); rash; hives.
- **herpes zoster infections** that can cause shingles have happened in people who received NUCALA.

Please see additional Important Safety Information throughout. Please see full **Prescribing Information**, including **Patient Information**, for NUCALA at NUCALA.com.

Nucala
(mepolizumab)
Injection 100 mg/mL

IT'S A DIFFERENT KIND OF COPD TREATMENT

Not an inhaler or a steroid—it's a biologic. NUCALA is a once-monthly* injection for COPD that, when added to your current treatment, can help reduce flare-ups. You know what else? With the easy-to-use Autoinjector,[†] you can take your injection right at home.

**ONCE A MONTH.
AT HOME.
ON YOUR TIME.**

*Every 4 weeks.

[†]Severe asthma patients rated the Autoinjector as easy-to-use after training. See full Instructions for Use.

Prefer getting your injections at your specialist's office? No problem. You can get your NUCALA injections at your specialist's office every 4 weeks.

It's important to monitor for serious allergic reactions after injection, either in your specialist's office or at home. Sometimes serious allergic reactions, including anaphylaxis, can happen hours or days after you get your NUCALA injection.

Important Safety Information (cont'd)

Before receiving NUCALA, tell your healthcare provider about all of your medical conditions, including if you:

- are taking oral or inhaled corticosteroid medicines. **Do not** stop taking your other medicines, including your corticosteroid medicines, unless instructed by your healthcare provider because this may cause other symptoms to come back.
- have a parasitic (helminth) infection.
- are pregnant or plan to become pregnant. It is not known if NUCALA may harm your unborn baby.

Please see additional Important Safety Information throughout. Please see full [Prescribing Information](#), including [Patient Information](#), for NUCALA at [NUCALA.com](#).

THINK:

LESS FLARE-UPS

Results may vary.

LESS FLARE-UP RELATED HOSPITAL VISITS[‡]

Results may vary.

[‡]Based on the limits of the study, this result is descriptive.

LESS TOTAL DOSES PER YEAR VS OTHER COPD BIOLOGIC[§]

No comparative efficacy or safety conclusions can be drawn from this information.

[§]Every 4 weeks vs every other week.

WAIT, THERE'S MORE.

NUCALA has been shown to be effective in a range of patients with **moderate to very severe COPD**.

Please see additional Important Safety Information throughout. Please see full [Prescribing Information](#), including [Patient Information](#), for NUCALA at [NUCALA.com](#).

READY TO START TALKING?

Have an honest conversation
with your specialist.

Here are some things to keep in mind:

1. SHARE YOUR SYMPTOMS

Am I having frequent COPD flare-ups?

2. DISCUSS SIMPLE BLOOD TESTING

Do I need blood testing to measure
my eosinophil levels?

3. ASK ABOUT TREATMENT OPTIONS

Is NUCALA the next step for me?

Please see additional Important Safety Information throughout.
Please see full [Prescribing Information](#), including [Patient Information](#), for NUCALA at [NUCALA.com](#).

with

Nucala
(mepolizumab)

COVERAGE SUPPORT

We'll check your insurance coverage and help you understand your benefits.*

COST SUPPORT

Whether you're insured or not, we're here to let you know about the options to help pay for NUCALA if you are eligible.

PATIENT SUPPORT

Your Patient Navigator is at the heart of our program, offering tailored support throughout your treatment journey.†

Ready to learn more?

Visit [TogetherwithNUCALA.com](#) or call 1-844-Call-TwGSK (844-225-5894).

*The information provided by Together with NUCALA is not a guarantee of coverage or payment.

†Your Patient Navigator does not provide medical advice and is not a part of your doctor's care team. Please ask your doctor any questions that you might have about your disease and treatment with NUCALA.

Are you commercially insured? Pay as little as \$0 for NUCALA.

Subject to program maximums.‡

The NUCALA Copay Program helps eligible commercially insured patients with their eligible out-of-pocket costs for NUCALA.

‡Program annual maximums apply. Visit [NucalaCopayProgram.com](#) for information about eligibility and full program terms and conditions.

Important Safety Information (cont'd)

Before receiving NUCALA, tell your healthcare provider about all of your medical conditions, including if you (cont'd):

- are breastfeeding or plan to breastfeed. You and your healthcare provider should decide if you will use NUCALA and breastfeed. You should not do both without talking with your healthcare provider first.
- are taking prescription and over-the-counter medicines, vitamins, and herbal supplements.

The most common side effects of NUCALA include: headache, injection site reactions (pain, redness, swelling, itching, or a burning feeling at the injection site), back pain, and tiredness (fatigue). Diarrhea and cough have been reported with COPD.

Please see additional Important Safety Information throughout.
Please see full [Prescribing Information](#), including [Patient Information](#), for NUCALA at [NUCALA.com](#).

MEET A DIFFERENT KIND OF COPD TREATMENT

It's not an inhaler or a steroid. NUCALA is the first and only once-monthly* COPD biologic that targets inflammation by reducing eosinophils.†

*Every 4 weeks.

†It is not fully understood how NUCALA works.

WHAT COULD ADDING NUCALA MEAN FOR YOU?

LESS flare-ups

LESS flare-up related hospital visits‡

Results may vary.

‡Based on the limits of the study, this result is descriptive.

LESS total doses per year vs other COPD biologic§

No comparative efficacy or safety conclusions can be drawn from this information.

§Every 4 weeks vs every other week.

DON'T WAIT.

Ask your specialist if NUCALA is right for your kind of COPD.
