

Reflect and Write

As you continue treating your asthma, it's important to focus on the things that help you stay motivated. NUCALA is an add-on, prescription maintenance treatment for patients 12 and older with severe eosinophilic asthma. NUCALA is not used to treat sudden breathing problems.

Think about it: Is there something you'd like to do, or somewhere you'd like to go? Write those thoughts down in the boxes, cut them out, and hang them somewhere you'll see them every day.

I'm excited about ...	I'm thankful for ...
Something I hope to discover is ...	I'm committed to ...
I'm inspired by...	One day I will...

Important Safety Information

Do not use NUCALA if you are allergic to mepolizumab or any of the ingredients in NUCALA.

Do not use to treat sudden breathing problems.

Please see additional Important Safety Information on Page 2.

Nucala 
(mepolizumab)
for Subcutaneous Injection
100 mg/vial

**TIP**

Don't limit yourself to only six thoughts. You can get creative, or just grab a pen and some paper to write down more affirming thoughts. Inspire yourself to stay positive during your treatment.

Important Safety Information (cont'd)

NUCALA can cause serious side effects, including:

- **allergic (hypersensitivity) reactions, including anaphylaxis.** Serious allergic reactions can happen after you get your injection of NUCALA. Allergic reactions can sometimes happen hours or days after you get a dose of NUCALA. Tell your healthcare provider or get emergency help right away if you have any of the following symptoms of an allergic reaction:
 - swelling of your face, mouth, and tongue
 - breathing problems
 - fainting, dizziness, feeling light-headed (low blood pressure)
 - rash
 - hives
- **Herpes zoster infections** that can cause shingles have happened in people who received NUCALA.

Before receiving NUCALA, tell your healthcare provider about all of your medical conditions, including if you:

- are taking oral or inhaled corticosteroid medicines. **Do not** stop taking your other asthma medicines, including your corticosteroid medicines, unless instructed by your healthcare provider because this may cause other symptoms to come back.
- have a parasitic (helminth) infection.
- are pregnant or plan to become pregnant. It is not known if NUCALA may harm your unborn baby.
 - A pregnancy registry for women who receive NUCALA while pregnant collects information about the health of you and your baby. You can talk to your healthcare provider about how to take part in this registry or you can get more information and register by calling 1-877-311-8972 or visit www.mothersbaby.org/asthma.
- are breastfeeding or plan to breastfeed. You and your healthcare provider should decide if you will use NUCALA and breastfeed. You should not do both without talking with your healthcare provider first.
- are taking prescription and over-the-counter medicines, vitamins, and herbal supplements.

The most common side effects of NUCALA include: headache, injection site reactions (pain, redness, swelling, itching, or a burning feeling at the injection site), back pain, and weakness (fatigue).

Please see additional Important Safety Information on Page 1.

Please see full Prescribing Information, including Patient Information Leaflet, for NUCALA available at NUCALA.com.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.
